# INDEX TO VOLUME XXV

Acetone and butyl alcohol, Some factors involved in the biological production of ..... 201
Acid-fast bacilli in the blood of tuberculous patients. Abstract ..... 98
—— —— organisms, Atypical. II. Some observations on filtration experiments ..... 576
Action, The, of hexylresorcinol on bacteria in certain food products ..... 521
Active immunization against poliomyelitis. Abstract ..... 78
Adams, C. L., Ruchhoft, C. C., Coulter, E. W. and Sotier, A. L. The disappearance of the coli-aerogenes group in natural purification processes as determined by direct plate counts ..... 143
Advantages, The, of O'Meara's modification of the Voges-Proskauer test. Abstract ..... 40
Agar coagulating bacteria. Abstract ..... 39
Amorphous phases of bacteria, Observations on ..... 545
Anderson, D. A. and Walker, R. H. Changes in the viscosity of solution cultures induced by various species of rhizobium. Abstract ..... 54
—— and ——. The effect of nitrogen source on oxygen consumption by rhizobium. Abstract ..... 53
Apparent, The, cause of an infectious enteritis of very young lambs. Abstract ..... 91
Application of statistics to problems in bacteriology. I. A means of determining bacterial population by the dilution method ..... 101
Asheshov, Igor. Study on collodion membrane filters. Part I ..... 323
——. Study on collodion membrane filters. Part II ..... 339
Atypical acid fast organisms. II. Some observations on filtration experiments ..... 576

Bacillary forms in hemolytic streptococcus cultures. Abstract ..... 95
*Bacillus megatherium*, Cytological changes during the formation of the endospore in ..... 261
—— *mycoides*, Secondary colonies of bacteria with special reference to ..... 359
Bacteria, Acid fast, Single cell dissociation of ..... 157
——, Observations on amorphous phases of ..... 545
——, Secondary colonies of, with special reference to *Bacillus mycoides* ..... 359
——, Studies of freshwater. I. A direct microscopic technique ..... 277
——, Studies on cultural requirements of. III. The diphtheria bacillus ..... 509
——, The action of hexylresorcinol on, in certain food products ..... 521
Bacterial counts of milk, A weighted mean method of averaging ..... 253
—— population, A means of determining, by the dilution method. Application of statistics to problems in bacteriology. I ..... 101

Bacterial variants of Kuhn, The relation of the, to the chief phases in microbic dissociation..... 572
—— variation, A hypothetical view of..... 580
—— ——, Symposium on..... 545
*Bacterium coli*, Studies of, in privately owned rural water supplies..... 623
Bacteroides, The, of human feces..... 309
Bacteriological culture media for water analysis, Some results on the use of crystal violet in..... 439
—— studies on the curing of meat. Abstract..... 71
—— study of acute enteritis in infants and young children. Abstract..... 90
Bacteriology, Application of statistics to problems in. I. A means of determining bacterial population by the dilution method..... 101
——, Some pitfalls in..... 565
Badger, L. F. Immunology and serology of the typhus-like group of diseases. Abstract..... 77
Baldwin, I. L. and Brown, L. W. The oxidation-reduction character of agar media and the growth of aerobic bacteria. Abstract..... 29
Barnes, Margaret N. and Rahn, Otto. On the lethal radiation from the human body. Abstract..... 28
Batchelor, Harold W. Some physical factors affecting the determination of the number of nitrogen fixing bacteria in soil. Abstract..... 57
Bayne-Jones, Stanhope and Petrilli, Alexander. Cytological changes during the formation of the endospore in *Bacillus megatherium*..... 261
*B. coli*, Relation of changes in morphology and metabolism in..... 123
Behrens, C. A. and Ferguson, M. W. Preservation of purified vaccinia virus. Abstract..... 79
Bengston, Ida A. The potency testing of *Vibrion septique* antitoxin. Abstract..... 84
Berry, J. A. Destruction of microörganisms at various freezing temperatures. Abstract..... 74
——. Detection of microbial lipase by copper soap formation..... 433
——. Lactobacilli in frozen pack peas. Abstract..... 75
Berry, Robert N. Some new heat resistant, and tolerant organisms causing spoilage in tomato juice. Abstract..... 72
Bigger, Joseph W. and Griffiths, L. L. A weighted mean method of averaging bacterial counts of milk..... 253
Biological fluids, A pipette electrode for the determination of pH in..... 435
Biological production of acetone and butyl alcohol, Some factors involved in the..... 201
Biology of the tubercle bacillus: III. Does the so-called fatty capsule serve to protect the tubercle bacillus?..... 447
Blake, Francis G. and Trask, James D. Pneumococcus variants intermediate between the S and R forms..... 289
Boak, R. A. and Carpenter, C. M. The effect of various therapeutic agents on *Brucella abortus* infection in guinea pigs. Abstract..... 88
——, —— and Warren, S. L. The *in vivo* thermal death time of *Treponema pallidum*. Abstract..... 93

Branham, S. E. and Lillie, R. D. Experimental meningitis in guinea pigs. Abstract ..... 90
Breden, C. R. and Buswell, A. M. The use of shredded asbestos in methane fermentations. Abstract ..... 69
Breed, Robert S., Pederson, Carl S. and Yale, M. W. Temperature uniformity in bacteriological incubators. Abstract ..... 66
Broadhurst, Jean. Observations on amorphous phases of bacteria ..... 545
—— Three contested types of bacterial growth in a single species, *Bacillus polygenesis*. Abstract ..... 32
Brodie, Maurice. Active immunization against poliomyelitis. Abstract ..... 78
Bronfenbrenner, J. The stimulation of bacterial metabolism by bacteriophage. Abstract ..... 25
Broom, Norma H. and Norton, John F. Acid-fast bacilli in the blood of tuberculous patients, Abstract ..... 98
Brown, L. W. and Baldwin, I. L. The oxidation-reduction character of agar media and the growth of aerobic bacteria. Abstract ..... 29
Brucellar agglutinins, The significance of, in human sera ..... 415
Buswell, A. M. and Breden, C. R. The use of shredded asbestos in methane fermentations. Abstract ..... 69
Butyl alcohol, Some factors involved in the biological production of acetone and ..... 201

Carapetian, Haikaz and Hadley, Philip. A study of the infective qualities possessed by G phase cultures of *Bacillus typhosus*. Abstract ..... 94
Carpenter, C. M. and Boak, R. A. The effect of various therapeutic agents on *Brucella abortus* infection in guinea pigs. Abstract ..... 88
——, Boak, R. A. and Warren, S. L. The *in vivo* thermal death time of *Treponema pallidum*. Abstract ..... 93
Carpenter, Harriet M. and Long, Perrin H. Experiments with Kendall's medium ..... 241
Cataphoretic velocity and virulence of streptococci isolated from throats of humans, from raw milk, flies and water during epidemics of the common cold. Abstract ..... 89
Changes in the viscosity of solution cultures induced by various species of rhizobium. Abstract ..... 54
Clifton, C. E. Oxidation-reduction potentials of cultures of *Staphylococcus aureus* ..... 495
Coleman, Marion B. and Gilbert, Ruth. A study of undulant fever in New York State. Abstract ..... 87
Coli-aerogenes group, The disappearance of the, in natural purification processes as determined by direct plate counts ..... 143
Collodion membrane filters, Study on. Part I ..... 323
—— —— ——, Study on. Part II ..... 339
Comparison of a modified Eijkman test with standard methods in the detection of fecal pollution of drinking water. Abstract ..... 39

Conn, H. J., Chairman. Report of Committee on Bacteriological Technic: Progress during 1932. Abstract ..... 20
——, What direction soil bacteriology? Abstract ..... 52
Control of anaerobic sporeformers in Emmenthal cheese making. Abstract. 64
Cooper, M. L. Bacteriological study of acute enteritis in infants and young children. Abstract ..... 90
Copper soap formation, Detection of microbial lipase by ..... 433
Corpron, Ruth and Larkum, N. W. Effect of massive and repeated doses of bacteriophage. Abstract ..... 77
Coulter, E. W., Ruchhoft, C. C., Adams, C. L. and Sotier, A. L. The disappearance of the coli-aerogenes group in natural purification processes as determined by direct plate counts ..... 143
Craigie, James. Observations on the elementary bodies of vaccinia. Abstract ..... 79
Crystal violet, Some results on the use of, in bacteriological culture media for water analysis ..... 439
Cultural requirements of bacteria, Studies on. III. The diphtheria bacillus ..... 509
Curran, Harold R., Rogers, L. A. and Whittier, E. O. The distinguishing characteristics of *Lactobacillus acidophilus* ..... 595
Cytological changes during the formation of the endospore in *Bacillus megatherium* ..... 261

Dairy products, Species of escherichia-aerobacter organisms responsible for some defects in ..... 461
Davis, C. W., Werkman, C. H. and Tarnutzer, C. A. Notes on the trimethylene glycol fermentation. Abstract ..... 33
Davis, Gordon E., Philip, Cornelius B., and Parker R. R. The isolation from the Rocky Mountain wood tick (*Dermacentor andersoni*) of strains of *Bact. tularense* of low virulence for guinea pigs and domestic rabbits. Abstract ..... 87
Demeter, Karl J. Control of anaerobic sporeformers in Emmenthal cheese making. Abstract ..... 64
Desiccation, The, and preservation of infectious laryngotracheitis virus .... 245
Destruction of microörganisms at various freezing temperatures. Abstract .. 74
Detection of microbial lipase by copper soap formation ..... 433
Determination, The, of organic acids produced in fermentations. Abstract .. 68
Detoxification, The, of pollen antigens. Abstract ..... 100
Development and control of microörganisms in pulp and paper mill systems. Abstract ..... 70
Differential staining, The Gram stain and ..... 309
Dilution method, A means of determining bacterial population by the. Application of statistics to problems in bacteriology. I. ..... 101
Dimock, W. W. and Edwards, P. R. The diversity of types present in stock cultures of *Streptococcus epidemicus*. Abstract ..... 60
Diphtheria bacillus, The, Studies on cultural requirements of bacteria. III .. 509
Disappearance, The, of the coli-aerogenes group in natural purification processes as determined by direct plate counts ..... 143

Dissociation of an acid-fast organism. Abstract ..... 51
——, Single cell, of acid fast bacteria ..... 157
Distinguishing, The, characteristics of *Lactobacillus acidophilus* ..... 595
Diversity, The, of types present in stock cultures of *Streptococcus epidemicus*. Abstract ..... 60

Ecker, E. E. Host adaptability of *Treponema pallidum*, Some remarks on Koch's postulates in syphilis. Abstract ..... 92
Edwards, Philip R. Further studies on the differentiation of human and animal strains of hemolytic streptococci ..... 527
—— and Dimock, W. W. The diversity of types present in stock cultures of *Streptococcus epidemicus*. Abstract ..... 60
Effect of massive and repeated doses of bacteriophage. Abstract ..... 77
——, The, of nitrogen source on oxygen consumption by Rhizobium. Abstract ..... 53
——, The, of $pCO_2$ on the nitrogen fixation process of certain leguminous plants. Abstract ..... 54
——, The, of physical environment on the cultural character of *Bacillus mycoides*. Abstract ..... 39
——, The, of various substances upon fat production by *B. megatherium*, *B. mycoides* and *B. albolactis*. Abstract ..... 36
——, The, of various therapeutic agents on *Brucella abortus* infection in guinea pigs. Abstract ..... 88
Eggerth, Arnold H. and Gagnon, Bernard H. The bacteroides of human feces ..... 389
Endospore in *Bacillus megatherium*, cytological changes during formation of the ..... 261
Engelbrecht, Mildred A. and Frost, W. D. The streptococci found in freshly drawn milk. Abstract ..... 58
England, C. W. and Stark, C. N. Some results in the use of crystal violet in bacteriological culture media for water analysis ..... 439
Epizootic hepato-enteritis in guinea pigs ..... 239
Escherichia-aerobacter organisms, Species of, responsible for some defects in dairy products ..... 461
*Escherichia coli*, A large-celled dissociative form of, and its relation to the so-called Pettenkofer bodies ..... 537
Evans, Alice C. Bacillary forms in hemolytic streptococcus cultures. Abstract ..... 95
Evans, Florence, and Tanner, F. W. Bacteriological studies on the curing of meat. Abstract ..... 71
Example, An, of anaerobic dissociation. Abstract ..... 51
Experimental meningitis in guinea pigs. Abstract ..... 90
Experiments with Kendall's medium ..... 241

Fatty capsule, so-called, Does the, serve to protect the tubercle bacillus? Biology of the tubercle bacillus. III ..... 447
Feces, Human, The bacteroides of ..... 389

Fehlmann, Hazel A. and Poe, Charles F. The action of hexylresorcinol on bacteria in certain food products ..... 521
Fellers, Carl R. Spoilage of maple products by molds. Abstract ..... 67
Felton, Lloyd D. Studies on the protective substance in antipneumococcus serum. Study 21. Comparison of certain characteristics of the water-insoluble proteins of antipneumococcus and of normal horse serum. Abstract ..... 76
Ferguson, Alice Jean and Rahn, Otto. Mitogenetic radiation as the cause of the influence of the number of organisms upon the lag period. Abstract ..... 28
Ferguson, W. W. and Behrens, C. A. Preservation of purified vaccinia virus. Abstract ..... 79
Fermentation flavors in syrups. Abstract ..... 68
Filters, Study on collodion membrane. Part I ..... 323
Filters, Study on collodion membrane. Part II ..... 339
Filtrability of the tubercle bacillus, Notes on life cycle phenomena and .... 587
Filtration experiments, Some observations on. Atypical acid fast organisms. II ..... 576
Fisher, L. W., Mellon, R. R. and Richardson, Ruth D. Further studies on the life cycle of the avian tubercle bacillus. Abstract ..... 45
Food products, certain, The action of hexylresorcinol on bacteria in ..... 521
France, Ralph L. Studies of *Bacterium coli* in privately owned rural water supplies ..... 623
Frazier, William C. The use of *Streptococcus thermophilus* in ripening milk for Swiss cheese. Abstract ..... 63
Fred, Edwin Brown. Anton van Leeuwenhoek. On the three-hundredth anniversary of his birth ..... 1
Fred, E. B. and Wilson, P. W. The effect of $pCO_2$ on the nitrogen fixation process of certain leguminous plants. Abstract ..... 54
Freshwater bacteria, Studies of. I. A direct microscopic technique ..... 277
Frey, Charles N. Yeast, its manufacture and use. Abstract ..... 67
Frobisher, Martin, Jr. Some pitfalls in bacteriology ..... 565
Frost, W. D. and Engelbrecht, Mildred A. The streptococci found in freshly drawn milk. Abstract ..... 58
Frozen foods from the health standpoint. Abstract ..... 74
Further studies on the differentiation of human and animal strains of hemolytic streptococci ..... 527
—— studies on the life cycle of the avian tubercle bacillus. Abstract ..... 45

Gagnon, Bernard H. and Eggerth, Arnold H. The bacteroides of human feces ..... 389
Gelatinolysis by aerogenic anaerobes. Abstract ..... 37
Georgi, C. E., Wilson, P. W. and Peterson, W. H. Respiration studies on rhizobia from various leguminous plants. Abstract ..... 53
Germicidal, The, efficiency of sodium hydroxide ..... 469
Gibbs, Charles S. The desiccation and preservation of infectious laryngotracheitis virus ..... 245

Gilbert, Ruth and Coleman, Marion B. A study of undulant fever in New York State. Abstract ..... 87
Goresline, Harry E. A pipette electrode for the determination of pH in biological fluids ..... 435
Gorini, Constantino. A method of detecting chymase production by bacteria. Abstract ..... 65
Gram stain, The, and differential staining ..... 309
Grant, Carroll W. and Rettger, Leo F. A systematic study of the mucosus-capsulatus group with special reference to the biological position of *Klebsiella pneumoniae* and *Aerobacter aerogenes*. Abstract ..... 42
Gray, J. D. Allan. The significance of brucellar agglutinins in human sera ..... 415
Graybiel, Ashton, Mueller, J. Howard, Klise, Katherine S., and Porter, Eliot F. Studies on cultural requirements of bacteria. III. The diphtheria bacillus ..... 509
Griffiths, L. L. and Bigger, Joseph W. A weighted mean method of averaging bacterial counts of milk ..... 253
Growth, The, of pathogenic organisms in milk. Abstract ..... 60
Guinea pigs, Epizootic hepato-enteritis in ..... 239

Hadley, Philip. The relation of the bacterial variants of Kuhn to the chief phases in microbic dissociation ..... 572
—— and Carapetian, Haikaz. A study of the infective qualities possessed by G phase cultures of *Bacillus typhosus*. Abstract ..... 94
Hall, H. H. and James, Lawrence H. Fermentation flavors in syrups. Abstract ..... 68
—— and ——. Yeast growth-promoting substances in white sugars. Abstract ..... 67
Halvorson, H. O. and Ziegler, N. R. Application of statistics to problems in bacteriology. I. A means of determining bacterial population by the dilution method ..... 101
Hammer, B. W. and Sarles, W. B. Species of escherichia-aerobacter organisms responsible for some defects in dairy products. Abstract ..... 62
—— and ——. Species of escherichia-aerobacter organisms responsible for some defects in dairy products ..... 461
Hastings, E. G. and McCarter, Janet. Dissociation of an acid-fast organism. Abstract ..... 51
—— and Sagen, H. E. The effect of physical environment on the cultural character of *Bacillus mycoides*. Abstract ..... 39
Heller, Hilda Hempel. The apparent cause of an infectious enteritis of very young lambs. Abstract ..... 91
Hemolytic streptococci, Further studies on the differentiation of human and animal strains of ..... 527
Henrici, Arthur T. Studies of freshwater bacteria. I. A direct microscopic technique ..... 277
Hepato-enteritis, Epizootic, in guinea pigs ..... 239
Heredity as a factor in the resistance of rats to *Salmonella enteritidis*. Abstract ..... 93

Hexylresorcinol, The action of, on bacteria in certain food products..... 521
Hitchcock, Charles H., Joffe, Eleanore W. and Mudd, Stuart. Surface of intestinal bacteria before and after serum sensitization. Abstract..... 24
Hitchens, A. P. Agar coagulating bacteria. Abstract..... 39
Hofer, A. W. Veal infusion as a medium for purity tests of cultures of rhizobia. Abstract..... 56
Holm, August and Leonard, George F. The purification of diphtheria toxoid. Abstract..... 83
Host adaptability of *Treponema pallidum*. Some remarks on Koch's postulates in syphilis. Abstract..... 92
Hucker, G. J. A review of the bacteriology of the normal and infected udder. Abstract..... 58
Human and animal strains of hemolytic streptococci, Further studies on the differentiation of..... 527
Hussong, R. V. A large-celled dissociative form of *Escherichia coli*; and its relation to the so-called Pettenkofer bodies..... 537
Hypothetical, A, view of bacterial variation..... 580

Immunology and serology of the typhus-like group of diseases. Abstract..... 77
Independent variation of bacterial properties. Abstract..... 49
Ingraham, Mary A. and Fred, E. B. The relation between the bacteriostatic action of gentian violet and the oxidation-reduction potential of the medium. Abstract..... 23
*In vivo*, The, thermal death time of *Treponema pallidum*. Abstract..... 93
Irwin, M. R. Heredity as a factor in the resistance of rats to *Salmonella enteritidis*. Abstract..... 93
Isolation, The, from the Rocky Mountain wood tick (Dermacentor andersoni) of strains of *Bact. tularense* of low virulence for guinea pigs and domestic rabbits. Abstract..... 87

James, Lawrence H. Frozen foods from the health standpoint. Abstract.. 74
James, Lawrence H. and Hall, H. H. Fermentation flavors in syrups. Abstract..... 68
—— and ——. Yeast growth-promoting substances in white sugars. Abstract..... 67
Joffe, Eleanore W., Hitchcock, Charles H. and Mudd, Stuart. Surface properties of intestinal bacteria before and after serum sensitization. Abstract..... 24
Johns, C. K. and Lochhead, A. G. The relative efficiency of various methods of sterilization of milk utensils in the destruction of *Es. coli*. Abstract... 62
Johnson, M. J. and Peterson, W. H. Fermentation of acetoacetic acid and pyruvic acid by the acetone-butanol organism, *Cl. acetobutylicum*. Abstract..... 69
Jones, Lloyd R. Studies on variability of *C. diphtheriae*. Abstract..... 97

Kahn, Morton C. and Schwarzkopf, Helen. Single cell dissociation of acid fast bacteria..... 157
Kahn, R. L. Skin response as a measure of immunization and sensitization. Abstract..... 81

Kaplan, Leah, and Kaplan, M. L. The Gram stain and differential staining.. 309
Kaplan, M. L. and Kaplan, Leah. The Gram stain and differential staining.. 309
Kendall's medium, Experiments with.... 241
Klise, Katherine S., Mueller, J. Howard, Porter, Eliot F. and Graybiel, Ashton. Studies on cultural requirements of bacteria. III. The diphtheria bacillus.... 509
Kopeloff, Lenore M., Kopeloff, Nicholas and Raney, Mary E. A study of typhoid agglutinins and conditioned reflex. Abstract.... 99
Kopeloff, Nicholas, Kopeloff, Lenore M. and Raney, Mary E. A study of typhoid agglutinins and conditioned reflex. Abstract.... 99
Koser, Stewart A. and Saunders, Felix. The utilization of certain substituted sugars by bacteria. Abstract.... 32
Kuhn, The relation of the bacterial variants of, to the chief phases in microbic dissociation.... 572

Lactobacilli in frozen pack peas. Abstract.... 75
*Lactobacillus acidophilus*, The distinguishing characteristics of.... 595
Lange, William F. Relation of changes in morphology and metabolism in *B. coli*.... 123
Large-celled, A, dissociative form of *Escherichia coli*; and its relation to the so-called Pettenkofer bodies.... 537
Larkum, N. W. and Corpron, Ruth. Effect of massive and repeated doses of bacteriophage. Abstract.... 77
Laryngotracheitis virus, The desiccation and preservation of infectious.... 245

——, The, between the bacteriostatic action of gentian violet and the oxidation-reduction potential of the medium. Abstract..... 23
——, The, of the bacterial variants of Kuhn to the chief phases in microbic dissociation..... 572
Relative, The, efficiency of various methods of sterilization of milk utensils in the destruction of *Es. coli*. Abstract..... 62
Report of Committee on Bacteriological Technic: Progress during 1932. Abstract..... 20
Rettger, Leo F. and Grant, Carroll W. A systematic study of the mucosus-capsulatus group, with special reference to the biological position of *Klebsiella pneumoniae* and *Aerobacter aerogenes*. Abstract..... 42
—— and Slanetz, Lawrence W. A systematic study of the fusiform bacteria. Abstract..... 43
—— and Weinstein, Louis. Some factors involved in the biological production of acetone and butyl alcohol..... 201

Review, A, of the bacteriology of the normal and infected udder. Abstract... 58
Rice, Christine E., Reed, G. B. and Orr, J. H. Variation in tubercle bacilli in pulmonary tuberculosis. Abstract... 96
Richardson, Ruth D., Mellon, R. R. and Fisher, L. W. Further studies on the life cycle of the avian tubercle bacillus. Abstract... 45
Rockwell, George E. The detoxification of pollen antigens. Abstract... 100
Rogers, L. A., Curran, Harold R. and Whittier, E. O. The distinguishing characteristics of *Lactobacillus acidophilus*... 595
Rohner, Martha, and Sears, H. J. A variable proteus-like organism fermenting carbohydrates without gas formation. Abstract... 50
Rosenow, E. C. Cataphoretic velocity and virulence of streptococci isolated from throats of humans, from raw milk, flies and water during epidemics of the common cold. Abstract... 89
Ruchhoft, C. C., Coulter, E. W., Adams, C. L. and Sotier, A. L. The disappearance of the coli-aerogenes group in natural purification processes as determined by direct plate counts... 143

S and R forms, Pneumococcus variants intermediate between the... 289
Sagen, H. E. and Hastings, E. G. The effect of physical environment on the cultural character of *Bacillus mycoides*. Abstract... 39
Sanborn, J. R. Development and control of microörganisms in pulp and paper mill systems. Abstract... 70
Sarles, W. B. and Hammer, B. W. Species of escherichia-aerobacter organisms responsible for some defects in dairy products. Abstract... 62
—— and ——. Species of escherichia-aerobacter organisms responsible for some defects in dairy products... 461
Saunders, Felix and Koser, Steward R. The utilization of certain substituted sugars by bacteria. Abstract... 32
Scherago, M., Williams, W. L. and Weaver, R. H. Comparison of a modified Eijkman test with standard methods in the detection of fecal pollution of drinking water. Abstract... 39
Schwarzkopf, Helen and Kahn, Morton C. Single cell dissociation of acid fast bacteria... 157
Sears, H. J. and Rohner, Martha. A variable proteus-like oragnism fermenting carbohydrates without gas formation. Abstract... 50
Secondary colonies of bacteria with special reference to *Bacillus mycoides*... 359
Semi-solid, A, medium for anaerobic cultivation. Abstract... 38
Sera, human, The significance of brucellar agglutinins in... 415
Shaw, Myrtle and Sickles, Grace M. Organisms which decompose the specific carbohydrates of pneumococcus, Types II and III. Abstract... 99
Sherman, J. M. and Wahby, A. M. The growth of pathogenic organisms in milk. Abstract... 60
Sickles, Grace M. and Shaw, Myrtle. Organisms which decompose the specific carbohydrates of pneumococcus Types II and III. Abstract... 99
—— and Wadsworth, Augustus. Studies of local reactivity to the bacterial toxins. Abstract... 80

Sickles, Gretchen R., Wadsworth, Augustus, and Quigley, James J. The preparation of diphtheria toxoid by treatment of the toxin with one per cent formalin and precipitation with acetone. Abstract..... 82
Significance, The of the "induction effect" in mitogenetic radiation. Abstract..... 27
——, The, of brucellar agglutinins in human sera..... 415
Single cell dissociation of acid fast bacteria..... 157
Skin response as a measure of immunization and sensitization. Abstract.. 81
Slanetz, Lawrence W. and Rettger, Leo F. A systematic study of the fusiform bacteria. Abstract..... 43
Smith, Olga A. Some effects of salt on the morphology of *Bacillus megatherium*. Abstract..... 49
Society of American Bacteriologists, Thirty-fourth Annual Meeting of the. 19
Sodium hydroxide, The germicidal efficiency of..... 469
Some effects of salt on the morphology of *Bacillus megatherium*. Abstract.... 49
Some factors involved in the biological production of acetone and butyl alcohol..... 201
Some new heat resistant, acid tolerant organisms causing spoilage in tomato juice. Abstract..... 72
Some physical factors affecting the determination of the number of nitrogen fixing bacteria in soil. Abstract..... 57
Some pitfalls in bacteriology..... 565
Some results on the use of crystal violet in bacteriological culture media for water analysis..... 439
Sotier, A. L., Ruchhoft, C. C., Coulter, E. W. and Adams, C. L. The disappearance of the coli-aerogenes group in natural purification processes as determined by direct plate counts..... 143
Sparrow, J. Carvel. The effect of various substances upon fat production by *B. megatherium*, *B. mycoides* and *B. albolactis*. Abstract..... 36
Species of escherichia-aerobacter organisms responsible for some defects in dairy products. Abstracts..... 62
Species of escherichia-aerobacter organisms responsible for some defects in dairy products..... 461
Spoilage of maple products by molds. Abstract..... 67
Spray, Robb Spalding. An example of anaerobic dissociation. Abstract.. 51
—— A semi-solid medium for anaerobic cultivation. Abstract..... 38
Stahly, G. L. and Werkman, C. H. Gelatinolysis by aerogenic anaerobes. Abstract..... 37
Staining, Differential, The Gram stain and..... 309
*Staphylococcus aureus*, Oxidation-reduction potentials of cultures of..... 495
Stark, C. N. and England, C. W. Some results on the use of crystal violet in bacteriological culture media for water analysis..... 439
Stearn, Allen E. Rationalization, from the viewpoint of physical chemistry, of the behavior of bacteria toward dyes, with special reference to staining. Abstract..... 21
Stimulating, The, effect of potato extract on the butyric acid bacteria. Abstract..... 26
Stimulation, The, of bacterial metabolism by bacteriophage. Abstract.... 25

Streptococci, The, found in freshly drawn milk. Abstract ..... 58
Studies of *Bacterium coli* in privately owned rural water supplies ..... 623
—— of freshwater bacteria. I. A direct microscopic technique ..... 277
—— of local reactivity to the bacterial toxins. Abstract ..... 80
—— on cultural requirements of bacteria. III. The diphtheria bacillus ... 509
—— on the meningococcus. Abstract ..... 75
—— on the protective substance in antipneumococcus serum. Study 21. Comparison of certain characteristics of the water-insoluble proteins of antipneumococcus and of normal horse serum. Abstract ..... 76
—— on variability of *C. diphtheriae*. Abstract ..... 97
Study, A, of the infective qualities possessed by G. phase cultures of *Bacillus typhosus*. Abstract ..... 94
——, A, of typhoid agglutinins and conditioned reflex. Abstract ..... 99
Study, A, of undulant fever in New York State. Abstract ..... 87
—— on collodion membrane filters. Part I ..... 323
—— on collodion membrane filters. Part II ..... 339
Suggestions for the classification of the genera micrococcus, sarcina, neisseria and streptococcus. Abstract ..... 41
Surface properties of intestinal bacteria before and after serum sensitization. Abstract ..... 24
Sweany, Henry C. Notes on life cycle phenomena and filtrability of the tubercle bacillus ..... 587
Symposium on bacterial variation. Abstracts of certain papers presented before the Society of American Bacteriologists, December 28, 1932 ..... 545
Systematic, A, study of the fusiform bacteria. Abstract ..... 43
——, A, study of the mucosus-capsulatus group, with special reference to the biological position of *Klebsiella pneumoniae* and *Aerobacter aerogenes*. Abstract ..... 42
——, The, relationship of actinobacillus. Abstract ..... 44

Tanner, F. W. and Evans, Florence. Bacteriological studies on the curing of meat. Abstract ..... 71
Tarnutzer, C. A., Werkman, C. H. and Davis, C. W. Notes on the trimethylene glycol fermentation. Abstract ..... 33
Tatum, E. L. and Peterson, W. H. The stimulating effect of potato extract on the butyric acid bacteria. Abstract ..... 26
Temperature uniformity in bacteriological incubators. Abstract ..... 66
Thirty-fourth Annual Meeting of the Society of American Bacteriologists .. 19
Thompson, Luther. The systematic relationship of actinobacillus. Abstract ..... 44
Three contested types of bacterial growth in a single species, *Bacillus polygenesis*. Abstract ..... 32
Tittsler, Ralph P. The advantages of O'Meara's modification of the Voges-Proskauer test. Abstract ..... 40
Trask, James D. and Blake, Francis G. Pneumococcus variants intermediate between the S and R forms ..... 289
Tubercle, bacillus, Biology of the: III. Does the so-called fatty capsule serve to protect the tubercle bacillus? ..... 447

Tubercle, bacillus, Does the so-called fatty capsule serve to protect the? Biology of the tubercle bacillus, III. ... 447
—— ——, Notes on life cycle phenomena and filtrability of the. ... 587
Tuthill, J. B. and Rahn, Otto. The significance of the "induction effect" in mitogenetic radiation. Abstract ... 27

Use, The, of shredded asbestos in methane fermentations. Abstract ... 69
——, The, of *Streptococcus thermophilus* in ripening milk for Swiss cheese. Abstract ... 63
Utilization, The, of certain substituted sugars by bacteria. Abstract ... 32

Variable, A, proteus-like organism fermenting carbohydrates without gas formation. Abstract ... 50
Variation in *Cl. welchii*. Abstract ... 96
—— in tubercle bacilli in pulmonary tuberculosis. Abstract ... 96
Veal infusion as a medium for purity tests of cultures of rhizobia. Abstract ... 56

Wadsworth, Augustus, Quigley, James J. and Sickles, Gretchen R. The preparation of diphtheria toxoid by treatment of the toxin with one per cent formalin and precipitation with acetone. Abstract ... 82
